

## “FIX THIS COUNTRY”

I think I have read more than one letter to the editor from Sackett. His views are paramount in the business of fixing this country. It will take more than TERM LIMITS though.

What prompted me to write this is the name he gave the new party, “One Termer.” Of course it will take more than that, and I know Sackett knows this. Let’s focus on the biggest of our problems. “IMPROPRIETIES.” Yes it is huge. Auto expenses, remaining overnight out of the city they live in, paying their relatives to work for the government, \$600 dollar toilet seats in the 1970’s, (it is more than that now in the 21<sup>st</sup> Century), the money (cash) we give to foreign countries for what...I don’t know, the subsistence in dollars we provide to 3<sup>rd</sup> world nations when we cannot even help our homeless that are a result of government aided inaction’s, I can go on and on and on.

Of the People, By the People, and For the People, “What was that middle thing?” I always use this cliché because it is appropriate and was a catchall line in the movie called “A Fish Called Wanda,” made by Kevin Klein when the English man who was orchestrating the Monday morning bank robbery said to his bank robbers, “Now does everyone understand what their job is Monday morning?” This is where the 90% of us are on all topics regarding CHANGES to the government. Knowing that “Changes” are tortuous, and also knowing that by the time we reach retirement at 65 or 70, the better part of our brain power has diminished far below what it was in our adult working years. Those adult working years are the years we are inundated with doing our job, trying to hold on to our job, making sure we contribute to society (locally mostly), raising our family requiring us to be attentive to making it work. By the time the day is complete and the rest from the weekend, we are exhausted and have no time to join a movement to CHANGE the government.

You would think that when a small percentage of the population in a city joins in force and demonstrates against this or that, that they would be effective in their movement. NO SO, no CHANGE really takes place. When CHANGE is effective is when the government (local) marches through the streets and dislodges the homeless from what or where they try and settle for a night, the government MOVES them to some other place. This is what is effective from the government’s views. I could go on and on and on about what CHANGES need to take place, but there is NO ONE there....knock knock.

Each of the above paragraphs in whole is meaningful to get to my point. It is about SACKETT’s letters to the editor. Quoted from Sackett’s letter, “A mandate to fix this country once and for all.” This is what is PARAMOUNT in the business of making CHANGE. No one man or woman, not one group, or a new party called “Term Limits” are going to fix this country. Think about it now. The US government, political parties, congress, the top nine, president, vice president, aids, all the coat tailers... I could go on and on and on, there are soooo many government entities with IMPROPRIETIES it is like the little Dutch boy trying to plug the holes in the dike. He cannot do it with just the digits on both hands.

Here is what we need. EYES. Yes EYES to bring to the table for the people to see what is going on. Then, like the twelve regions of the Federal Reserve system made in 1913, an entity that can be the watch dog over the government, federal, state and local (call it “Government Limit System”) that review from the EYES of the people all of the (call it) ERRORS that are tabled and need fixing. It is called MONEY to do this, but the MONEY that could be spent to create a “ Government Limit System” would be soooo small compared to the IMPROPRIETIES that are happening today, every day, to put in effect an OVERHAUL. Yes an OVERHAUL to represent the PEOPLE and BUSINESS to effect CHANGE, the most tortuous thing that plagues us all. This will be upsetting to the government in total, because they, the GOVERNMENT, are the people as well which includes all the constituents and the shirt tailers that feed off of the PEOPLE. Of the people, For the people, and By the people that have been hoodwinked, buffaloeed, told half truths, have had the truth with held from them, and cannot figure out the upside from the downside as to what is happening with our GOVERNMENT.

“Government Limit System” the watchdog Of the People, For the People, and By the People.

“EYES”, twelve regions across the nation that read From the People all the “IMPROPRIETIES” and table them for review by the “Government Limit System.” The “Tea Party” cannot do this. No “One Termer” can do this. It takes “CHANGE.”

It is true as the day is long, that trying to make CHANGE by doing the same thing over and over and over again is the SIGN of an idiot, or someone or entity that just can’t see or understand all the problems as a whole. Who are we anyway?

Dear Editor, please post this in your OPINION section.

Thank you very much,

Patrick Tarzian
